

Oury Health Tech Ltd - Corporate Timeline – 2019 2nd Quarter

December 2018 and prior	See the Document “Oury Health Tech Timeline Phase 1”.
Feb 6, 2019	Billy Bob leads the first regular meeting of the Executive team, now that the Executive Dashboard rollout has begun. Attending are the VP’s of Finance, IT, Human Resources, Marketing and Production. The VP of Facilities was in the room just before the meeting started, but was called away to an emergency. These meetings will occur every Monday, Wednesday and Friday morning until decided otherwise. The Executive Dashboard Cash Flow metric was reviewed.
Feb 8, 2019	At the 2 nd Executive Team meeting, the TrackR Units Production metric was reviewed. All 6 VP’s attended. When the BA was finished with the Executive Dashboard item, the BA left the room. Then the VP of Facilities surprised everyone by referring to the January 17 Month End Financial Statements and suggesting that OHT would be better off if OHT “killed” the TrackR product line immediately. Billy Bob and the Marketing VP disagreed, and the HP VP had to calm the room and then end the meeting.
Feb 10, 2019	<p>The Friday Executive Team meeting introduced the TrackR Customer and End-User Returns metric. All VP’s, except for Facilities and Production, were present.</p> <p>Once the BA had left the room, the Finance VP thanked everyone for their good thoughts and prayers, as OHT once again had just enough cash in the bank to meet payroll. The overdraft would be used to handle regular supplier payouts. If the Cash-On-Hand was \$15,000 less, then OHT probably would have had to start bankruptcy proceedings.</p> <p>In the Call Centre, the Customer Service Manager for the TrackR team leaves his written job application to a fast food chain by the coffee machine. It appears to be a serious job application. Rumours had been circulating that OHT was considering out-sourcing the Call Centre jobs, and this caused a major increase in staff anxiety.</p>
Feb 13, 15 and 17, 2019	Executive Team meetings continue, with almost perfect attendance. Meetings last an average of 30 minutes. After each meeting, various VP’s leave in smaller groups, discussing common issues. Billy Bob becomes concerned, as he realizes that the VP’s are becoming a team, and not routing all issues through him.
March 8, 2019	The new TrackR Social Media Marketing team of 3 is officially formed. Two other persons begin their 6 week, 40 hour per week

Oury Health Tech Ltd - Corporate Timeline – 2019 2nd Quarter

contracts, to be application developers for the TrackR App Upgrade. The new TrackR Social Media Marketing (TSSM) Manager is also tasked to be the Project Manager.

March 10, 2019 The Friday Executive Team meeting starts by reviewing the status of the 6 Metrics. All metrics are within normal parameters. It is then realized that the meeting took only 12 minutes, and yet everyone has a good sense of the “as of right now” overall company operational status. The general comment is “We’ve come a long way in one month!”.

Attendance at these meetings has been high. The Facilities VP regularly misses the Monday meeting, and the Production VP misses every 2nd Friday meeting.

So, another 15 minutes is spent discussing about why the phone system seems to be overloaded, and it is difficult to make out-going phone calls.

March 15, 2019 The TrackR App Upgrade (TAU) team officially launches the TrackR Instagram channel.

The TAU program manager, who is also the TSSM manager, gives the Marketing VP a printout of a recent Google Search Results for OHT. On it are several results for TRackR complaints. There is also a result for a “conestogadesignltd.com” that has two amateurish pages on a line of Medical Imaging equipment that OHT no longer sells.

March 17, 2019 The Finance VP confirms to the Marketing VP that OHT does indeed have a paid-up Internet domain name.
